### COMMENTARY

#### RESULTS

Net distributable income of P86.2 million (14.26 thebe per unit) is 6.6% up on the comparative P80.9 million (13.38 thebe per unit). While revenue grew by 4.6% excluding rental straight line adjustments, property costs decreased by 4.7%. This decrease in property costs was driven by lower impairments and excluding this, costs increased by 12%, as a result of an 18% in security, refuse and cleaning costs and a 64% increase in repairs and maintenance due to a phased maintenance and servicing schedule. Portfolio costs have decreased by 1.7%.

Profit before tax is 2.7% below the comparative while profit after tax is 8.8% up. The fair value and other accounting adjustments net of tax amount to a P1.7 million (2021: P0.1 million) and account for the difference between distributable income and profit after tax. The tax credit is primarily the result of the indexation adjustments which reduces the deferred tax liability.

External valuations are prepared annually for the year end. The Board has retained the last external valuations for these interim results with the exception of Riverwalk, where a desktop valuation has been performed using the same methodology and discount rate as that used for the 2021 year end.

The unimpaired exposure to debtors excluding the VAT impact is P2.2 million at 31 January 2022.

#### PROPERTY PORTFOLIO

Three properties were acquired during the period at a total cost of P63.0 million. These acquisitions were funded from available cash and the property yield is expected to be higher than the return on cash. The properties are retail properties located in Maun, Ghanzi and Ramotswe and complement the existing portfolio. They are fully tenanted with 92% of rentals generated from listed and multinational tenants. Directors' have valued these assets at original cost in these interim results. It is possible that the external valuer will value these assets at a capitalisation rate that differs to the acquisition yields at year end.

Vacancies have remained at similar levels to year end, while there has been a significant reduction on monthly tenancies from 11% to 6% during the period.

The new acquisitions have utilised existing cash resources and creates the opportunity to introduce gearing for future acquisitions. Gearing at moderate levels should enhance the long term returns to investors but does introduce some exposure to interest rate fluctuations.

#### PERFORMANCE TRENDS
