### COMMENTARY

#### RESULTS

On 26 July 2013, distribution number 4 of 8.39 thebe was declared based on the Board's estimate of total distributable income of P101 million. Actual distributable income for the year of P101.6 million is marginally ahead of this projection.

Net income from operations (before rent straight line adjustment) amounts to P104.5 million, a 10% increase on last year's P95.3 million. Net distributable income of P101.6 million has increased by 14% from last year's P89.2 million as a result of this and the reduction in taxes related to these earnings.

Profit for the year is 29% above last year as a result of the increase in distributable profits as well as higher increases in the fair value adjustments of assets. Fair value and other accounting adjustments, net of related taxes, are treated as non-distributable and do not result in cash flows.

#### PROPERTY PORTFOLIO

The investment properties were valued by Curtis Matobolo of Knight Frank at P1 061 million at a weighted average capitalisation rate of 11.19%.

The carrying value of investment property of P1 016m is lower as a result of assets reflected elsewhere in the statement of financial position and an adjustment for the nature of title in one of the properties.

Vacancies amounted to 3.6% by gross lettable area and 2.8% by rental value at year end.

#### PROSPECTS

The property portfolio continues to perform in line with management expectations and is expected to deliver distribution growth to investors flowing from rental escalations.

While it is not the intention to grow purely for the sake of growth, NAP and its asset manager continue to seek suitable investment opportunities to enhance long term sustainable growth and, with an almost ungeared portfolio, NAP is well placed to take advantage of opportunities that do arise. This is particularly challenging in the current Botswana market where the demand for investment property offering acceptable returns exceeds supply. This has been exacerbated by the fact that new development opportunities are limited in view of the economic slowdown and significant recent development in the retail and office segments, particularly in Gaborone.

Future developments and acquisitions will be funded through a combination of cash, debt and equity, as appropriate at the time. From a long term perspective the Board considers it appropriate to increase the debt level in the portfolio to provide the positive effects of gearing over time. The current challenge to this is the limited availability of property and, as a result, the likely yields relative to the cost of debt in the short term.

### NOTES

- The abridged financial results have been extracted from the audited annual financial statements, which have been prepared on a going concern basis in accordance with International Financial Reporting Standards ("IFRS") under the historical cost convention, as modified by the measurement of investment properties and certain financial assets and financial liabilities at fair value. The accounting policies followed in preparation of the annual financial statements are consistent with those applied in the prior year.
- The Group's business activities are concentrated in the retail property rental segment and are primarily carried out within Botswana.
- There are no contingent liabilities or commitments at 31 July 2013.
- Distribution attributable to linked unitholders is reconciled to comprehensive income as follows:

	2013		2012
